TO THE TRADE.

——PREFACE TO "MONARCH" CATALOGUE NO. 1.——

APPRECIATING the disadvantages under which architects, contractors and builders, house painters and decorators, and varnish dealers labor on account of not being able to know the *quality* of varnishes until they have been used, and on account of certain impositions that have been practiced by some varnish manufacturers, we have adopted the word "MONARCH" as a trade mark to be used on *all* of our *standard* architectural varnishes.

TO ARCHITECTS we desire to say that when they are seeking a line of varnishes that are positively without fault as far as *quality* is concerned (to specify for use on the finest grades of work), we would recommend our "MONARCH" brand. When these varnishes are specified, no uneasiness need be felt on account of the practical results, as perfect satisfaction is absolutely guaranteed.

TO CONTRACTORS, BUILDERS, HOUSE PAINTERS, DECORATORS AND DEALERS we can only say that the greatest amount of skill and the utmost care is exercised in the manufacture of our "MONARCH" varnishes, and we recommend them, having every confidence that they will prove entirely satisfactory; not only "working" but "wearing" extremely well in service.

TDCAT 1890
PAPV02B367 8-14-02

In the following list, the "MONARCH" varnishes are arranged with a brief description of each.

We feel that these goods supply a long felt want (a full line of architectural varnishes of the highest and of unquestionable quality), and we hope that our many friends and customers among the architects, consumers and dealers will take advantage of our latest effort to make it possible for them to be sure of obtaining the best varnishes at moderate prices

CHAS. H. GILLESPIE & SONS.

NOTE.—The trade-marks "AZOTE" and "ACME" being now so well known to the trade, the trade-mark "MONARCH" is not used on these Liquid Dryers.

——PREFACE TO "MONARCH" CATALOGUE NO. 2.——

Since catalogue No. 1 of our "MONARCH" varnishes, etc. was issued, the sale of these goods has increased in an enormous degree and *they have been adopted as standard* by many of the leading architects, contractors, builders, master painters and decorators, and dealers in the country.

We take pleasure in submitting "MONARCH" catalogue No. 2 to the trade in general, with a *full guarantee* that the varnishes, etc. described therein are of unquestionable quality and especially noted for brilliancy, elasticity and durability.

New York, July 1st, 1890. CHAS. H. GILLESPIE & SONS.

Special discount to the trade and large consumers. Correspondence solicited.

Monarch Elastic Wood Finish.

(EXTERIOR.)

This Exterior Finish is proof against atmospheric changes and is expressly adapted for Store Fronts, Front Doors, Blinds, Bath Rooms, Vessels, Yachts, and all outside work. It will not crawl, crack, pit, bloom or turn white. It has a brilliant gloss and works freely under the brush, and is very light in color.

We recommend this Exterior Wood Finish in preference to any Spar Varnish in the market. It is impervious to water and dampness and has no superior for outside work. It is not affected by salt water.

Monarch Spar Varnish

Is also proof against atmospheric changes, and adapted for Vessels, Yachts, etc., as salt water does not affect it. For Store Fronts, Doors, and all outside work it is excellent. A single trial will demonstrate its superiority over all other Spar Varnishes.

Monarch Elastic Wood Finish.

(INTERIOR.)

The most durable Finish for use on natural and stained woods and all inside wood decorations, preserving their natural color. It dries quicker than our Exterior Elastic Wood Finish, leaving a brilliant gloss ; or can be rubbed to a dead finish. It can be used on Outside Work where dispatch is necessary and where there is not an extreme exposure. It is of very light color.

Monarch Preservative

Is also intended for finishing natural and stained woods, hard wood floors, and all inside wood decorations, preserving their natural color. It is similar to our *Monarch Spar Varnish*, but dries quicker. It can be flowed on, leaving a brilliant gloss, or can be rubbed to a dead finish.

It can also be used on Outside Work where dispatch is necessary, and is of very light color.

Monarch Elastic Floor Finish

Is most durable for use on hard wood and painted floors. It is not affected by hot or cold water, or when washed with soap and water; dries very hard and retains its gloss for an extremely long time. It will not crack or peel off. One coat will double the "life" of a linoleum or oil cloth floor, and will prevent its fading. When used on kitchen floors there is no trouble in keeping them bright and clean.

Monarch Hard Oil Finish.

(WHITE.)

For finishing Furniture, Organs, Cabinet Ware and Inside Work of Dwellings, Public Buildings, &c. It is also used on White Holly and all other light colored woods. It will not discolor the lightest wood.

MONARCH HARD OIL FINISH.
(LIGHT.)

For finishing Furniture, Organs, Cabinet Ware and Inside Work of Dwellings, Public Buildings, &c. It is also used for first and second coats on Polished Work. This grade of Hard Oil Finish is the most popular in the market, and is unexcelled.

MONARCH HARD OIL FINISH.
(DARK.)

For finishing Black Walnut Furniture, Organs, Cabinet Ware and Inside Work of Dwellings, Public Buildings, &c. It is also used for first and second coats on Polished Work. "Dark" MONARCH Hard Oil Finish is of the same quality as "Light," except in color.

MONARCH OIL SHELLAC.

Light in color, and used for finishing hard wood, and especially adapted for hurried work, as two coats can be applied in one day. A very superior article. Should be applied the same as our MONARCH Hard Oil Finish.

MONARCH WHITE DAMAR.

Made from the lightest selected Batavia gum. It is used in zinc-white for gloss, also for varnishing wall paper, etc.

MONARCH COACH VARNISH.

(EXTRA No. 1.)

This is an excellent quality, outside Varnish, and designed for Wagons, Running parts of Carriages, Graining and all ordinary outside work. It is very elastic, and "flows out" well.

MONARCH COACH VARNISH

(No. 1.)

Is a quicker drying outside Varnish and not as light in color as our Extra No. 1 Coach. Adapted for Wagons, Graining and all ordinary outside work where an extra light colored varnish is not required.

MONARCH FURNITURE VARNISH.

(EXTRA No. 1.)

This Varnish is a superior article made from selected gum. It has a good body and dries well with a fine lustre, and is suitable for furniture and inside work.

MONARCH FURNITURE VARNISH.

(No. 1.)

A very fine grade of No. 1 Furniture Varnish, but a trifle darker in color than our Extra No. 1 Furniture. Has a good body and dries with a brilliant lustre, and is suitable for furniture and inside work.

MONARCH LIQUID WOOD FILLER.

A transparent Filler for close grained woods. Apply with a brush, and varnish without first rubbing off. If a finer finish is desired, sandpaper lightly before applying the Varnish. Does not settle and mixes readily with our Stains.

MONARCH WHITE LIQUID DRYER.

A very powerful and colorless Liquid Dryer. Mixes with oil or varnish without curdling and does not "burn" the paint. Can be used in "flat white" paint in place of Patent Paste Dryer, and with much better results.

Azote Liquid Dryer

Is light in color and mixes readily with oil or varnish without curdling or separating.

One gallon mixed with twenty (20) gallons of Raw Linseed Oil, will dry better than any kettle-boiled Linseed Oil.

It is very "elastic," will not cause cracking of the paint, and contains the maximum amount of oil it is possible to use, and still have it possess the very strongest drying properties.

It has good "body," does not "burn" the paint, or destroy its gloss. Paint containing AZOTE will wear much longer than when inferior Dryers are used.

AZOTE has been proven by careful practical test, to be the very best Liquid Dryer in the market. It is more powerful than japan.

ACME LIQUID DRYER.

A light colored Union Dryer. Mixes with oil or varnish, without curdling, and is more powerful than japan.

MONARCH COACH JAPAN.

A strong Dryer ; mixes readily with oil or varnish without curdling. It is light in color and is for use on the finest grades of work.

MONARCH BROWN JAPAN.

This is our old reliable Brown Japan which has given universal satisfaction for many years. Heavy body, light color, and mixes readily with oil or varnish.

MONARCH TURPENTINE ASPHALTUM.

A pure Asphaltum Varnish made from selected gum. It is excellent for use on all kinds of iron work. Dries rapidly with a good gloss.
